SUMMARY

Fresher in Computer Science Engineering with strong coding skills and a solid understanding of Data Structures and Algorithms. Experienced in building full-stack applications using the MERN stack (MongoDB, Express.js, React.js, Node.js). Interested in backend development and system design. Quick learner, adaptable, and eager to contribute to real-world software development.

PROJECTS

- **Personal Expense Tracker — MERN Stack**

Project Link — GitHub

- Developed and deployed a full-stack expense tracking web application using **MongoDB, Express.js, React.js, and Node.js**.
- Built secure **RESTful APIs** and designed optimized **MongoDB schemas** for efficient transaction management and fast data retrieval.
- Implemented **real-time expense tracking, categorization, and dashboard analytics** to provide actionable financial insights.

- **GigShield AI** [Guidewire Project]

2026

- Developed **GigShield AI**, a smart income protection platform for delivery workers affected by **weather, pollution, traffic disruptions, and curfews**.
- Built features for **real-time risk monitoring** and **income-loss prediction** using environmental and traffic-related data.
- Designed a **responsive full-stack application** focused on financial safety, worker assistance, and **actionable analytics**.

SKILLS

Programming Languages: C, Java

Frontend: HTML, CSS, React.js, JavaScript

Backend: Node.js, Express.js, REST APIs

Currently Learning: Spring Boot

Database: MongoDB, SQL

Tools: Git, GitHub, VS Code, Postman

Core Subjects: Data Structures and Algorithms, DBMS

ACHIEVEMENTS

- Completed Data Structures and Algorithms training program by Smart Interviews(In JAVA)
- Solved problems on coding platforms like Hive, LeetCode and CodeChef
- CGPA: 9.33 / 10

POSITIONS OF RESPONSIBILITY

- Served as Deputy Head Boy, demonstrating leadership and team coordination skills

SOFT SKILLS

Communication, Teamwork, Problem-solving, Adaptability

LANGUAGES

Telugu (Native), English (Proficient)
